

PETER WILLIAMS-KEY

Target Role: Help Desk Support Specialist

Address: Pont-y-clun, UK | Phone: (+44)7711233307

Email: prkey94@gmail.com | GitHub: github.com/peterkey

Profile

IT Support professional with hands-on experience delivering **first-line technical support** in high-volume environments. Skilled at diagnosing and resolving issues across **Microsoft 365, Windows OS, Active Directory**, and mobile devices. Proven record of supporting **20+ colleagues and 120+ customers weekly**, achieving a **99% on-time service performance**. Technical projects include **workflow automation with Google Apps Script**, **macOS patching on unsupported hardware**, and **containerised service hosting with Docker and Tailscale**, demonstrating expertise in **troubleshooting, system administration, networking, and secure remote access**. Recognised for being calm under pressure, highly adaptable, and committed to resolving technical challenges efficiently.

Skills

Core IT Support: First-Line IT Support | Ticket Logging & Management | Troubleshooting | Microsoft 365 | Windows OS | Active Directory (basic) | Remote Support Tools | Hardware Resets & Configuration

Systems & Administration: System Patching & Bootloader Configuration (OpenCore Legacy Patcher) | Docker Desktop | Containerisation | Nextcloud | Plex Media Server | Home Assistant | Networking & Secure Remote Access | Zero-Trust VPNs (Tailscale) | Terminal / CLI | Basic Networking

Tools & Platforms: Microsoft Teams | Google Workspace | ServiceNow (basic) | Jira Service Desk (basic) | REST APIs | Git

Hardware & Devices: Handheld Scanners | Laptops | Desktop PCs | Mobile Device Support

Soft Skills: Customer Service | Problem Solving | Documentation | Team Collaboration | Adaptable | Calm Under Pressure

Experience

Tesco Stores PLC. | Customer Delivery Driver

06-2016 – Present

- Delivered first-line IT support for **20+ colleagues**, resolving Microsoft 365 login, Windows OS, and scheduling issues within minutes to maintain operational continuity.
- Troubleshot device and application errors, escalating unresolved issues to management for IT intervention and ensuring smooth business operations.
- Trained **10+ colleagues** 1:1 on a new online shift and holiday request system, enabling independent tool use and reducing reliance on management for IT queries.
- Administered and reset **50+ handheld delivery devices**, resolving hardware/software malfunctions to minimise disruption to daily delivery workflows.
- Provided real-time technical support to **120+ customers weekly** across mobile devices, e-receipt systems, and handheld scanners, achieving a **95%+ first-contact resolution rate**.
- Consistently achieved a **99% on-time service and delivery performance rating**, demonstrating reliability and strong customer service under pressure.

Technical Projects

Invoice Automation – Self-Led Project

Designed and implemented an automated invoicing workflow in **Google Sheets** using **Apps Script**, generating structured PDFs from spreadsheet data. Reduced manual errors and admin time by **30%**, demonstrating process improvement and scripting expertise.

macOS Sonoma Installation – Personal Project

Successfully installed and configured macOS Sonoma on an unsupported 2017 Intel MacBook Pro using **OpenCore Legacy Patcher (OCLP)**. Created and deployed a bootable USB installer, managed **APFS/EFI partitions via Terminal**, and resolved bootloader errors by manually replacing **EFI** files. Applied post-installation root patches to restore graphics and Wi-Fi, demonstrating advanced **macOS systems engineering, partition management, and low-level troubleshooting** skills.

Apple Hardware Repurposing – Personal Project

Repurposed a legacy 2012 iMac by upgrading it with **OpenCore Legacy Patcher** to run macOS Monterey, enabling modern containerisation and secure remote access. Installed and configured **Docker Desktop** to self-host **Nextcloud, Plex Media Server, and Home Assistant**, integrating **Tailscale** for zero-trust VPN connectivity. Demonstrated strong skills in **OS patching, containerisation, networking, and secure system administration** while extending the useful life of unsupported hardware.

Education

Udemy | The Web Developers Bootcamp

04-2022 – 04-2024

Hands-on course covering HTML, CSS, JavaScript, React, Node.js, Express, MongoDB, and version control. Developed practical skills in **technical troubleshooting, scripting, and system logic**.

University of South Wales | B.Sc. Sound Technology

Cardiff, UK | 09-2012 – 07-2015

Developed strong collaboration, technical documentation, and project coordination skills. Led technical projects using industry-standard hardware/software.

Certifications (In Progress)

CompTIA A+ Certification – Hardware, software, and troubleshooting fundamentals

Microsoft 365 Fundamentals (MS-900) – Cloud services and Microsoft 365 administration

Basic Active Directory Administration – User, group, and access management

ServiceNow & Jira Service Desk Basics – Ticketing systems and workflow management

Google IT Support Skills – Core IT troubleshooting and support

Additional Information

- Full UK Driving Licence and Right to Work in the UK
- Available for hybrid or on-site roles across South Wales

- Committed to continuous learning, professional development, and helping users overcome technical challenges
